

BEST DESIGNER AWARD & FASHION QUEEN CONTEST

A Fashion Show is a chance for a designer to show off a particular aesthetic, a particular mood, a particular feel or a point of view. As a result, fashion shows can tend to be conceptual and focused on a higher-level idea. The clothing selection from a line that one wants to exhibit is seemingly the most important aspect of the

event. The three most important components of a successful fashion show are a broad topic, a cohesive crew, and a well-thought-out schedule. A show needs to have a plan, including a theme, a place and date, music, and props. In essence, an image that one conveys to the public, so one thinks carefully about the items how they exposed their talents.

of

To align the conceptual frameworks the students, the Department of Fashion Designing and Apparel

Making held the Fashion Queen Competition and the Best Designer Award for Juniors and Seniors on March 30, 2023.

The 20 students of designers and models participated in the competition. The contest was inaugurated by the prayer song and welcome address. The program was carried out in the presence of JCI Mrs. Disney, Director, HIFI Parlour and Mrs. Maria Kapila. The students were provided with lot numbers. The ramp walk took place by lot numbers in which designers were explained about their designing and garments. At last, the best Dress Designer Award for Junior and seniors selected by Chief Guests. Ms. ThasneemFathima III B.Sc won the Best Dress Designer Award (Senior) and

Ms. Agnes Yuhanaof II B.Sc won the Best Dress Designer Award (Junior) and Miss Fashion Queen crowned by Ms. PanimalarJomiha of III B.Sc and her dress was designed by Ms. A. Maria Angel of III B.Sc. The crown was presented to students by Rev. Dr. Sr. Rubha and JCI Mrs. Disney, Director, HIFI Parlour. The programme was ended with a vote of thanks.

The top five competed in the preliminary question and answer round, and the final two were chosen one from final-year students and one from II and III-year students. Last, the Best Dress Designer Award for Juniors and Seniors was selected by Chief Guests. Ms. ThasneemFathima of III B.Sc. won the Best Dress Designer Award (Senior) and Ms. Agnes Yuhana of II B.Sc Junior) won the Best Dress Designer Award

(Junior) The final word portion was brought back, after which Miss Fashion Queen 2023 and her

one runner-up were announced.

Contestants from I, II and III B.ScFDAM were selected to compete in the competition. Twenty of these delegates were appointees to their positions after being a runner-up of their pageant or being selected through a casting process, while two were selected to replace the original dethroned winner. It was broadcast to hundreds of viewers in three classes. At the end of the event, JCI Mrs. Disney, Director, HIFI Parlour crowned Ms.PanimalarJomiha of III B.Sc as Miss

Fashion Queen 2023. The dress was designed by Ms.A. Maria Angel of III B.Sc. About 115 students and 7 faculty members participated in the event. The program successfully ended with a national anthem.

NATIONAL NUTRITION WEEK CELEBRATION 2022-2023

The Department of Food Science and Nutrition & Poshan Abiyaan Awareness Camp organized (ICDS) celebrated the National Nutritional week conducted a On 7th September 2022 Nutri-expo on “Eat Right Foods” Mr.SDR.Ponseelan, Chairman of SDR &ABI group of companies& Mrs. L.Sarawathi, District project officer, ICDS, Thoothukudi District. Mrs. Ruby, Child development programme officer in Thoothukudi. Our Principal Rev.Dr.Sr.Rubha, Vice Principal Mrs.C.Sathyalakshmi inaugurated the expo. The students well explained the benefits and component of the foods. The students displayed various food groups including nutrient rich and new recipes etc. Also healthy snacks, variety of millets food products were exhibited. It was eye opening enriched and it enhanced the quality of the food. The Anganwadi women from various blocks displayed traditional healthy foods. Mrs. Karolin, Head Department of Food Science & Nutrition welcomed the gathering. Mr.SDR.Ponseelan shared few words on the importance of nutrition, healthy foods, and chronic diseases. Mrs. L.Sarawathi also shared about ICDS and social welfare programme scheme for women. Prizes were distributed for various events conducted for the Food Science and Nutrition students. Mrs. A.Marithangam, Assistant Professor proposed the vote of thanks. School students, teachers, college students, staff and Anganwadi workers totally 260 members visited the Expo. This programme was useful, the students were eagerly participated.

DEPARTMENT OF FASHION DESIGNING & APPAREL MAKING

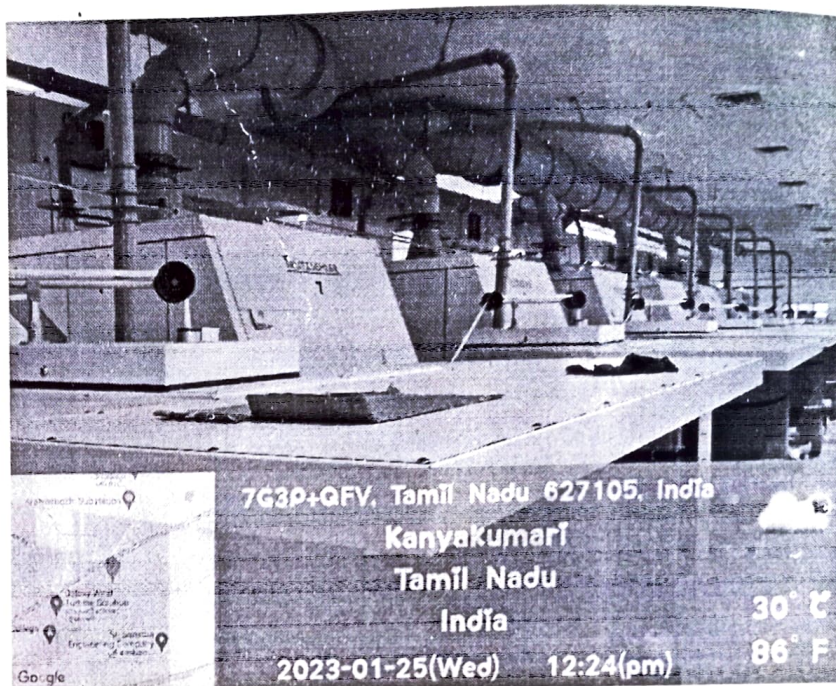

EVEN SEMESTER 2022-2023

INDUSTRIAL VISIT

INDUSTRIAL VISIT

The Department of Fashion Designing & Apparel Making, Holy Cross Home Science College, Thoothukudi instigated a stride in the academic year 2022-23 in order to deliver upright edification and instil practical knowledge amongst the students. An **Industrial Visit** was made to

Aralvaimozhi on **January 28, 2023** for the students of I B.Sc& III B.Sc (FD&AM).

The following staff members accompanied the students:

Ms, B.K.Binisha Joji, Assistant Professor

Ms. S.Ruzaina Sulthana, Assistant Professor

The visit was underway at 7 a.m from the campus with the faculties and undergraduates on **January 28, 2023**. On reaching the Aralvaimozhi at 11.30 a.m., permission was granted to the students and the faculty members to visit the sewing/ manufacturing units. The students and faculty members were greeted by Mr. S.Kannan, Manager, Aralvaimozhi. He gave an introductory talk about the whereabouts of the numerous units. The visit was instigated with various sections of embroidery, cutting machines, trimmings etc., shown to the students related to clients demand.

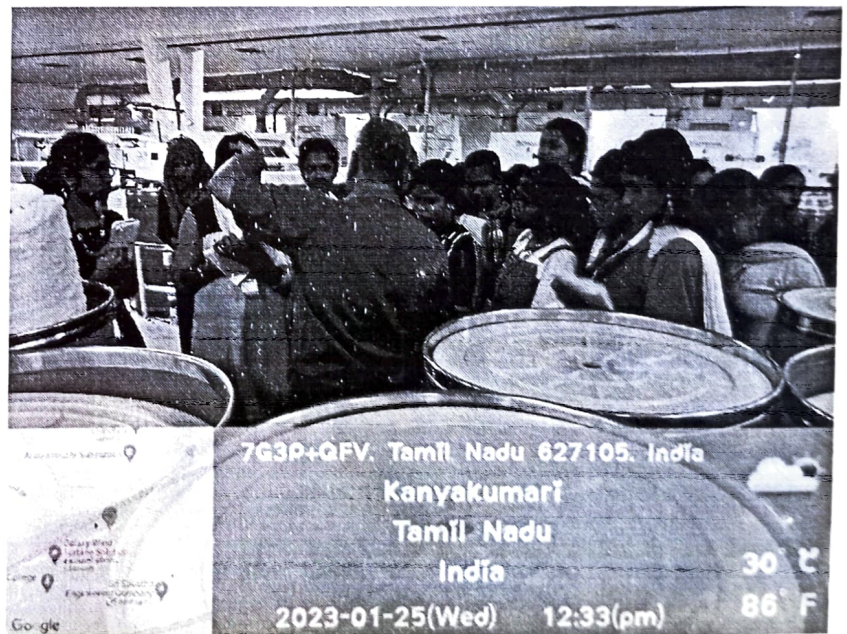

YARN MANUFACTURING PROCESS

- Bale opener
- Mixing
- blow-room
- Carding
- Drawing
- Combing
- Simplex (roving)
- Spinning (ring frame)

Bale Opening or Breaking:

- The cotton tufts were opened in this process.
- As the cotton arrives in an extremely compressed condition the first operation was to loosen the matted fibers
- The cotton fiber was loosening by means of rotating spiked rollers of the bale opener.

Mixing

Spinning:

Spinning was the first step of textile product processing. The process of making yarns from the textile fiber was called spinning. Spinning was the twisting together of drawn-out strands of

fibers to form yarn, though it was colloquially used to describe the process of drawing out, inserting the twist, and winding onto bobbins. There were different types of spinning, the most common forms of spinning were: Ring, Rotor spinning, Air Jet, and Friction.

In this process:

- The strands of cotton fibres were twisted together to form yarn.
- The yarn was placed on the rings of the spinning frame and was allowed to pass through several sets of rollers, which were rotating at a successively higher speed.
- The yarn was rolled by the rollers and wound up on the desired bobbins.
- This was the final stage of spinning the cotton yarn, in which drafting, twisting and winding of the yarn were all completed in one operation.
- The bobbins filled with yarn were then removed from ring frames and used for processing for bleaching, weaving, etc.

- This was a process of mixing the same/different categories of fibers to get desired properties and cost-effectiveness.
- Mixing was done after the study of the essential properties of fiber like staple length, Tensile strength, fineness, uniformity etc

Blow Room

- In this process, beaters and openers did the cleaning and opening of the cotton.
- The foreign materials like dust particles, seeds of cotton and other impurities were partially removed in this process.
- The cotton tufts were opened and cleaned in this process and the cotton lap was made out.

Carding

- Carding was the heart of spinning in this process the minute impurities like small seed particles, immature fibers etc. were removed.
 - The straightening and aligning of fibers were done in this process.
 - In carding the Blow room lap was attenuated to the card sliver.

Draw Frame

- Through drafting fibers get paralleled
- Up to Eight Carded Slivers were fed into the Draw-Frame and they were stretched/Straightened and made into a single sliver.
 - In addition, fiber blending can be done at this stage.

Simplex (Roving Frame)

- Further drafting was done here to get the fibers more aligned/paralleled.

- The Sliver from Draw-Frame was thicker and will be difficult to be fed into the Ring-frame as was, hence here the Slivers were stretched and were made thinner by Drafting and mild twisting (so as to strengthen the Roving).

- The End-Product from the Simplex was called as Roving.

Ring Frame (Spinning)

- The roving was fed into the Ring-frame and was made into yarn by further Drafting & Twisting.

- To draft the roving until the required fineness was achieved

- To impart strength to the fiber, by inserting a twist.

- Depending upon the yarn count required, the drafting and twisting could be adjusted.

Queries raised by the students and faculty members conversed during the visit. Finally, the visit ended with a vote of thanks from faculty members and students to

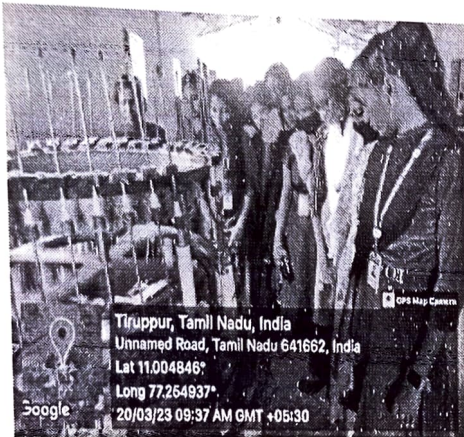

the personnel of manufacturing units for granting permission for the visit. Thirty students benefitted from the visit

Dept. of Fashion Designing & Apparel Making
Holy Cross Home Science College
Thoothukudi - 628 003

INDUSTRIAL VISIT

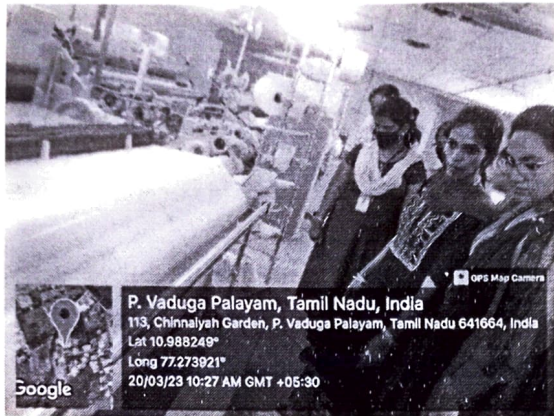

The present report is a compilation of the events, places visited and learnt from a 3 days educational trip to Tirupur and Ooty on March 19 to 21, 2023. The trip was organized by the Department of Fashion Designing and Apparel Making with the aim to aid the students to acquire basic knowledge about various machines used for weaving.

The trip started on March 19th night and reached Tirupur in early morning. On March 20, 2023 We visited 3 companies in

which the students learned about different weaving machines and dyeing processes. The students went to Light Private Ltd, The machines are electrical and used for weaving grey fabric and then the fabric goes for other processes. Then next they visited another weaving machine in which the machines were placed in Air Conditioned room. The warp yarn roller was placed at the bottom of the machine and weft yarns were placed at the side of the machine. The yarn was taken into the machine at high speed and the weaving process was started. The weaving is done at a very high speed. The quality of the cotton fabric manufactured using this machine is high. The temperature is maintained because of the speed which prevents the breaking of yarns. At last, they visited the dyeing unit, and the dyeing of fabric took part in different sizes of machines according to the weight of the fabric. The workers there explained how they prepare the colour shade of the dye for the customer. The colour shade was perfectly made by the machine and the sample was made for the customer. Then the dyeing of bulk products is made after the

customer's approval. The day went off in a very productive way. After visiting companies the students visited khaddar street for shopping, where students purchased some clothing and refreshed themselves.

At last, the students of III B.Sc thanked our institution, our Principal Rev. Sr. Rubha and the department head, Dr.S.M.D. Mathuravalli for this great opportunity to acquire knowledge by visiting different places. The department hopes that students had the best time to enjoy and had quality time to explore new info. Twenty students from III B.ScFDAM were accompanied by Mrs. J. Hilda YernestPackiam and Ms. V. Vishagalakshmi.

DEPARTMENT OF FOOD SCIENCE AND NUTRITION

Report On Baking Unit and Processing

PLACE : Industrial Visit (2021-2022) MADURAI

DATE : 29/07/2022

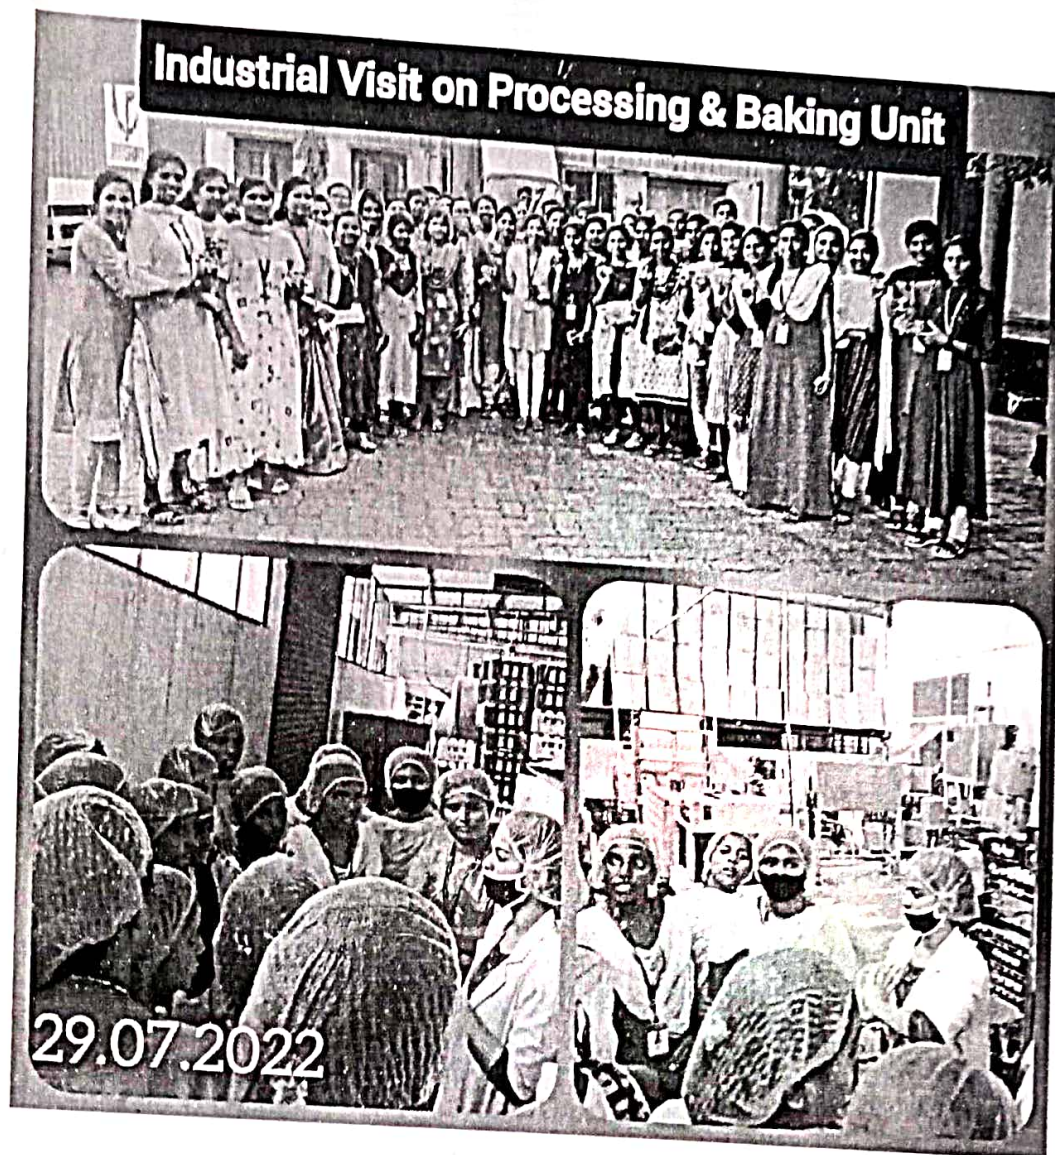

The Department of Food Science and Nutrition organized an Industrial visit on 29th July 2022 for 3rd year FSN 44 students for one-day visit to RUBY AGRO products and PARLY-G Biscuits (Patwari Bakers Pvt.Ltd.) at Madurai. This visit was organized with the prior permission and guidance of Principal Dr. Sr.Rubha and HOD of Food Science and Nutrition Department Mrs.A.Karoiln. Faculty member Mrs.K.Rosy coordinated the visit.

The One-day visit was organized with prior permission from RUBY AGRO products and PARLY-G Biscuits (Patwari Bakers Pvt.Ltd.), Madurai. The sessions conducted were very educational and gave the students the exposure as to how the industry and the outside market work. The students were benefited with the technical terms and the knowledge of how monitors and controls all the Manufacturing System such as Milk Preservation, Processing, different types of drinks, Biscuit preparation, procedures and types of food packaging in detailed. The company outreach plus opportunities were discussed which motivated the students to progress in their stream. This educational trip was very informative.

OUTCOME

The purpose of the Industrial Training is to provide exposure for the students on practical fields. Through this exposure, students will have better understanding on Baking and Processing practice in general and sense of frequent and possible problems. This training is part of the learning process and helped in fulfilling the academic requirement as per NEP, to bridge the gap

between class room teaching and industry requirements and to get corporate exposure and professional experience.

Report On Dry fish Processing Unit

PLACE : Industrial Visit (2021-2023) samathuvapuram, Thoothukudi

DATE : 13/10/2022

Aim

To visit a Dry fish processing unit

Objectives

- To know about the processing of fish
- To know about the methods of preservation of fish

Report

The 46 students of II B.Sc and M.Sc went to Nixon Miraalle Company with the guidance of Mrs.A.Karolin, Head of the department of Food Science and Nutrition and Ms.Sulochana, Assistant professor in the department of Food science and Nutrition. The company staffs explained us about the Masmin production and its processing. Students learnt that the processing is done by sun drying. They also explained the methods of processing like cleaning and heating and explained practically. We also learnt the packaging of Masmin. The Masmin is being packed in card boards in the company and it is being exported to various countries. The visit was very much useful and informative.

Department of Food and Nutrition

On February 9, 2023, 15 students with 1 lecturer went for a visit to some food industries. We started our trip at 9:00 AM and we reached Saravana salt plant in Davisapuram road, Mapillaiurani post Tuticorin around 9:45 AM.

We were guided by the staff of the salt plant who explained us about the process involved in their plant. The salt plant is specialized in manufacturing edible salt for human consumption, crystal salt, powder salt, iodized salt and free flow salt with the latest technology. The guide gave more knowledge about Himalayan Rock Salt. These salt are known for their high quality, their nutritive value and moisture free which are set for a longer period of time. This range of salt plant is engaged in offering a huge amount of iodized crystal salt. The lab technician who works in the salt plant demonstrated and explained the estimation of iodine content present in the salt. By this use found out that the salt should contain iodine in the value between 15-30 ppm. Many machines were operated in the salt plant and some of the machines have been upgraded recently to increase the process and package of the salt.

Our students gained knowledge of iodized salt and in this salt from this visit.

Report: Visit to Tamilnadu Agriculture University for Vermicompost Training Technology

On 17.08.2023, a group of 30 students of II B.Sc FSN visited Tamilnadu Agriculture University, Killikulam to receive training on Vermicompost Technology. The purpose of the visit was to gain insights into the latest techniques and advancements in vermin composting, which plays a crucial role in sustainable agriculture practices.

The day started with a warm welcome by Dr. Jeberlin prabhina Assistant Professor, Department of agricultural Microbiology, organizer of this program who introduced the participants to the significance of vermicomposting in enhancing soil health and nutrient recycling. The importance of adopting eco-friendly practices was emphasized. A series of comprehensive lectures were delivered by prominent experts in the field of vermicomposting. These sessions covered topics such as:

- Basics of Vermicomposting, Selection of Earthworm Species, Composting Substrates
- Vermicompost Benefits, Managing Vermicompost Systems, Laboratory testings, Terrace Gardening

Participants were provided with practical training sessions where they learned how to set up and manage vermicomposting systems. They got hands-on experience in preparing composting bins, introducing earthworms, monitoring moisture levels, and troubleshooting common issues.

Throughout the visit, there were interactive discussions and Q&A sessions. Participants had the opportunity to clarify doubts, share experiences, and learn from the experts' practical insights. The day concluded with a recap of the key takeaways and a certificate distribution ceremony. Students and Staff Incharge Ms. Ajitha.G expressed their gratitude for the enriching experience and the valuable knowledge gained during the visit.

PG AND RESEARCH DEPARTMENT OF COMMERCE

AN INDUSTRIAL VISIT TO BENCHMARK TEA FACTORY, OOTY, THE NILGRIS

13th MARCH, 2023

PG and Research Department of Commerce arranged an industrial visit to benchmark Tea and Chocolate factory for the final year UG and PG Students on 13th March, 2023. The students were accompanied by three faculty members Dr. S. Santhana Kamala, Dr. J. Elizabeth Vijaya and Dr. K. Bagavathi Thangam. The purpose of this industrial visit is to understand and experience the tea and chocolate making process in the factory.

During the Visit, Information of the entire Tea History and different stages of tea Processing Like withering, crushing, cutting/tearing/curling, shaping, fermentation, drying, cleaning and grading were explained. The students evinced keen interest in knowing different types of tea leaves and how they're made and all aspects about tea manufacture and working methods of employees. Regarding Chocolate factory students saw the various ingredients involved in the making of chocolate. They explained about the different types of refinement grades. Moving ahead we went through the processing of cocoa nibs into fine liquid form. This liquid was further processed and other ingredients were added depending upon the flavour requirement followed by the churning process which was by ball mills.

They had a view of how practically things are done and seemed to be very efficient. The students came to know about the interesting facts related to the process of manufacturing tea and chocolates and all other related aspects of selling and distribution.

The students were provided facility for purchasing different varieties of tea and chocolates. The visit was ended with a delicious cup of tea and chocolates provided by Benchmark to show their hospitality. We ended the day with some photographs and taken back some valuable information with us.

INDUSTRIAL VISIT REPORT TO NILA SEA FOODS PVT LTD., THOOTHUKUDI

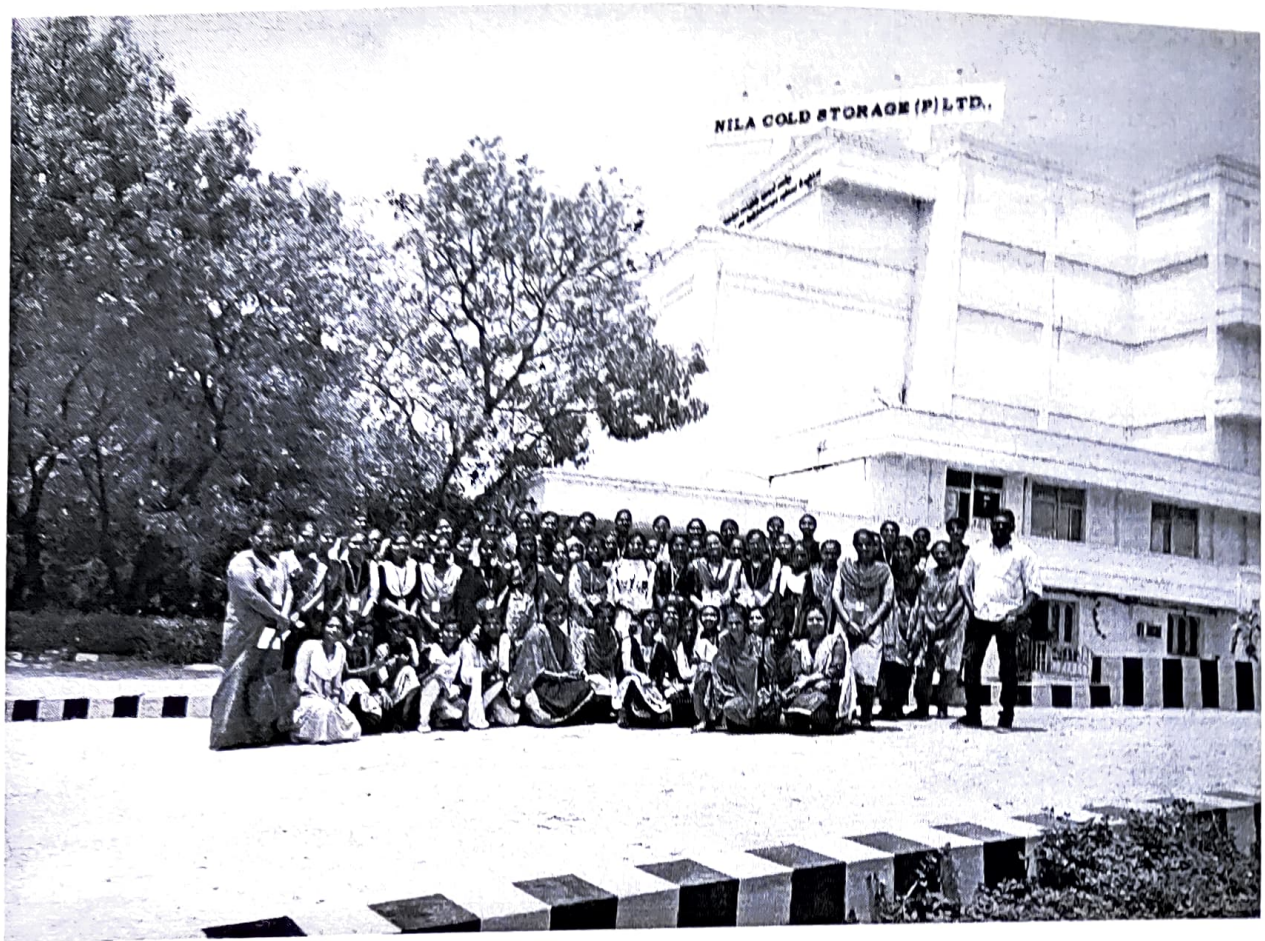

23rd March, 2023

An industrial visit to Nila Sea Foods Pvt Ltd., Thoothukudi was planned by PG & Research Department of Commerce especially for the students of II year students of B.Com in-order to enhance their practical stimulation and let them having an overview on the activities related to 'Logistics'.

The visit was organized with prior permission and guidance of Mr. Finny Manager of Nila Sea Foods Pvt Ltd. Mrs. M.Deena and Dr. Devi Sathya were the co-ordinators for this visit.

65 students benefitted from the visit and Mr.Finny, Manager of Nila Sea Foods guided the students. He elaborately explained the process of preserving sea foods and storing in the cold storage. He also described how it had been transferred to the shipment. The students came to know about the frozen degrees, how the products have been maintained and the products traded from the company to various places. The students were also enlightened about the BIN Card and colors of BIN card.

Industrial visits proved to be an excellent platform in bridging the gap between mere classroom learning and the actual work conditions. Thus it helped the students to inculcate the practical workplace environment and to render an opportunity to learn practically through interaction, working methods and employment practices.

Respected Sir,

Greetings from the Principal, Holy Cross Home Science College, Thoothukudi.

As internship brings professional experience for the students in the field of study and take their career ahead, we would like to arrange an internship for the students of III B.Sc Computer Science in your esteemed firm.

A hands-on training on 'Webapp Development' would give a practical learning experience in the latest technology for our students. Kindly permit a group of 4 students for internship training from 8/08/2022 to 20/08/2022 in your esteemed firm.

Anticipating a word of reply in this regard is highly solicited.

Thanking You

Yours Sincerely

Respected Sir,

Greetings from the Principal, Holy Cross Home Science College, Thoothukudi.

As internship brings professional experience for the students in the field of study and take their career ahead, we would like to arrange an internship for the students of III B.Sc Computer Science in your esteemed firm.

A hands-on training on 'Webapp Development' would give a practical learning experience in the latest technology for our students. Kindly permit a group of 5 students for internship training from 2/08/2022 to 20/08/2022 in your esteemed firm.

Anticipating a word of reply in this regard is highly solicited.

Thanking You

Yours Sincerely
